

Learning, Design and Technology Concentration

Ed.D. in Educational Leadership

A doctoral program designed for experienced education professionals ready to expand their leadership impact.

The concentration in Learning, Design and Technology is designed for those interested in careers as senior-level leaders in Learning, Design and Technology positions in higher education, K-12, corporate, government or military settings. The aim is to prepare 21st century leaders to engage in developing advanced professional knowledge and scholarly inquiry in varied learning, design and technology settings. To ensure the effectiveness of our graduates, coursework within the program is comprised of foundational work in educational leadership, research, and learning, design and technology specialization courses.

Students engage in learning that integrates theory with practical application for advanced technology application and development in educational settings.

48-Credit Hours

The program can be completed in four years, pending enrollment patterns and academic progression.

Location

LDT is a Distance Education concentration with 80% of courses online and 20% on main campus or remote location.

Curriculum

Select core leadership, concentration-specific, and research courses that align with your professional goals and scholarly interests.

Delivery

Classes are from 5:30 PM to 8:15 PM. Each course meets one evening per week, Monday thru Thursday.

Capstone

Complete an applied dissertation focused on a real-world problem in your area of concentration, using research and evaluation to understand current conditions and inform effective leadership decisions.
